Subject:	DATA SHEET	Version: 06	Date: July 2007
Product:	CapsuDar[®] Se-5	Catalogue Number: 46100	

- Description:** **CapsuDar[®] Se-5** is a microencapsulated sodium selenite. It is a fine, free flowing powder. The sodium selenite is adsorbed on cellulose fiber and coated with cellulose derivative.
- Specifications:**
- | | |
|--------------------------|----------------------------------|
| Appearance: | fine, white free flowing powder. |
| Particle size: | 50-1000 μ (300–18 mesh); |
| Sodium selenite content: | min. 4.8% (min. 1.4% Se) |
| Taste: | tasteless |
| Bulk density: | ~0.6 g/ml |
- Stability and Storage:** Upon storage in a dry place at room temperature this material will keep its properties for at least three years.
- Packing:** As required by customer. Preferably 20 kg rectangular carton.
- Applications:** Enrichment of food in dry preparations and low water content, e.g. chocolate spreads, cereals, nutritional bars, powdered beverages, vitamin tablets, capsule filling, mixing of dry incompatible ingredients, etc.
- Processing:** The material should be used as powder.
The material should not be crushed or milled before or during processing as it might break the microcapsules.
- Regulation:** All ingredients are kosher food quality materials and are approved by USA FDA and European authorities.
- Safety:** This product is safe for intended use. Avoid inhalation of dust or contact with eyes and mucous membranes by applying suitable protective measures and personal hygiene.
